Introduction

Arista VeloCloud SD-WAN 6.3.1 | **28th March 2025**

- Arista VeloCloud SD-WAN™ Orchestrator Version **R6310-20250320-GA**

Check for additions and updates to these release notes.

What Is in The Release Notes

VeloCloud Release 6.3.1 for Orchestrator introduces two new features for VeloBrain: VeloCloud **GenAI Operator** and VeloCloud **GenAI Reporting**. VeloBrain is a powerful AI operator that leverages generative AI to streamline operations and provide expert-level guidance, context, and automation for managing VeloCloud deployments. With this release, VeloCloud SASE™ customers and partners gain access to VeloCloud's advanced AI-driven Operator and Reporting tools, designed to improve usability and streamline troubleshooting processes.

The release notes cover the following topics:

Recommended Use

This Orchestrator release is recommended for all customers who require the features and functionality first made available in Release 6.3.0.

> **Note:**
>
> Customers with on-premises Orchestrators are required to contact Broadcom Technical Support to validate their upgrade playbook before the upgrade process.

Compatibility

Release 6.3.0 Orchestrators support all previous Arista SD-WAN Edge versions.

New Features and Enhancements

VeloBrain – VeloCloud GenAI Operator

The VeloBrain GenAI Operator, featuring a chat interface powered by Generative AI, delivers expert-level guidance, contextual insights, and automation to help customers and partners efficiently operate and optimize their SASE deployments. With this release, the VeloBrain chat interface will:

- Provide answers to product documentation and knowledge base inquiries, complete with references.

- Offer AI-assisted troubleshooting for selected events to significantly reduce time to resolution.

GenAI Reporting

The VeloCloud GenAI Reporting delivers enterprises detailed insights into Generative AI usage across their organizations with exclusive, GenAI-focused reports. This feature enhances visibility by providing customers with in-depth analytics on the adoption of top Generative AI applications within their network, along with identifying the key contributors driving their usage.
